

June 18				
9.30 Registration opens - foyer				
11.00 Aula Magna - Introduction and opening				
11.30-13.00 Aula Magna – Plenary lecture, Tarja Knuuttila: ‘Modeling, Representing and Experimenting: Synthetic Genetic Circuits in the Study of Biological Organization’				
13-14.30 Lunch break				
Time	Aula 'Conferenze' Philosophy of physics I - LAUDISA	Aula 'Verra' Philosophy of perception - RUSSO	Aula 24 Logic and applications I - MINARI	Aula 26 Scientific models, scientific realism - CEI
14.30-15.00	Allori: ‘Quantum Mechanics and Paradigm Shift’	Bacchini: ‘A Trouble for Disjunctivism’	Artemov/Protopopescu: ‘Intuitionistic Epistemic Logic’	Portides: ‘Why Scientific Models Cannot Be Treated as Works of Fiction’
15.00-15.30	Rossanese: ‘Structural Realism and Algebraic Quantum Field Theory’	Raftopoulos: ‘Theory-Ladenness of Perception and the Evidential Role of Perception’	Giordani: ‘Exploiting Justification Logic for Solving Gettier Problems’	Pero/Suarez: ‘Varieties of Misrepresentation and Homomorphism’
15.30-16.00	Vassallo/Ip: ‘On the Conceptual Issues Surrounding the Notion of Background Independent Bohmian Mechanics’	Ferretti: ‘Perception without Representations. Can Enactivism Really Reject Representations?’	Toader: ‘Believing Provable Propositions’	Giunti: ‘A Real World Semantics for Deterministic Dynamical Systems with Finitely Many Components’
16.00-16.30	Romano: ‘Decoherence and Bohmian Mechanics’	Di Bona: ‘The Spatiality of Auditory Perception’	Casadio/Sadrzadeh: ‘Cyclic Properties from Lambek Calculus vs. Pregroups. Applications to Word Order in Natural Language’	Cordero: ‘Content Reduction for Robust Realism’
Coffee break				
Time	Aula 'Conferenze' Philosophy of physics II - LAUDISA	Aula 'Verra' Causation - RUSSO	Aula 24 Logic and applications II - MINARI	Aula 26 Scientific realism and antirealism - CEI
17.00-17.30	Garola: ‘A Proposal for a Local and Non Contextual Extension of Quantum Mechanics’	Osimani: ‘Causing Something to be One Way rather than Another. Genetic Information, Causal Specificity and the Relevance of Linear Order’	Arpaia: ‘Logical Models for an Epistemology of Psychology’	Bschir: ‘Realism, Empiricism, and Ontological Relativity. A Happy Menage a Trois?’
17.30-18.00	Hubert: ‘A Common Ontology for Classical Physics and Quantum Mechanics’	Casini/Andreas: ‘A Ramsey-Test Counterfactual Account of Causation’	Paseka: ‘The Role of Linear Algebra in Logic – On the Extensions of Di Nola’s Theorem’	Alai: ‘Stars and Minds. “Empirical Realism” and Metaphysical Antirealism in Liberalized Neopositivism’
18.00-18.30	Ben-Yami: ‘Absolute Distant Simultaneity in Special Relativity’	Felline: ‘Causation, Regularities and Counterfactuals in Fundamental Physics: a Solution to the Bottoming-Out Problem’	Chajda: ‘The Logic Representing Basic Algebras’	Coffey: ‘Is Underdetermination a Problem for Structural Realism?’

June 19				
Time	Aula 'Conferenze' Mathematics and philosophy: historical considerations - BONIOLO	Aula 'Verra' Metaphysics and science I - FANO	Aula 24 Logic – D'AGOSTINO	Aula 26 Philosophy of the social sciences - RUSSO
9.30-10.00	Bordonì: 'On Determinism: the Debate between Mathematicians and Philosophers in France around 1880'		Orlandelli: 'Proof Analysis in Non-Normal Deontic Logics'	Fenici: 'The Role of Social Experience in Passing the False Belief Task: Maturation, Facilitation, Attunement, or Induction?'
10.00-10.30	Guzzardi: 'The Form of the Law. The Guiding Power of Mathematics in Ruggiero Bosovich's Curve'	Meyer: 'Action at a Temporal Distance'	Carrara/De Florio: 'Independence and Logicality'	Borghini/Nathan: 'Causal Mechanisms of Reinforcement in the Social Sciences'
10.30-11.00	Ugaglia: 'Potentiality and Iteration: on Aristotle's Processual Notion of Infinity'	Calosi: 'Persistence, Location and Change in Spacetime'	Porello/Troquard: 'A Logical Modeling of Artifacts' Behaviour'	Bianchin: 'Towards a Cognitive Account of Collective Intentionality'
Coffee break				
11.30-13.00 Aula Magna – Plenary lecture, Hannes Leitgeb: 'The Humean Thesis on Belief'				
13.00-14.30 Lunch break				
Time	Aula 'Conferenze' Logic, mathematics and computation: philosophical and historical issues - PIAZZA	Aula 'Verra' Metaphysics and science II - FANO	Aula 24 Epistemology I - CARRARA	Aula 26 Topics in the philosophy of science - SGARAVATTI
14.30-15.00	Von Plato: 'Wittgenstein's Struggles with the Quantifiers'	Torrenço: 'Metaphysical Explanations in Science'	Festa/Cevolani: 'Matthew Properties for Incremental Confirmation and the Weak Law of Likelihood'	Zipoli Caiani: 'Do Pictures Afford Actions? A New Information-Based Account of Affordances Perception'
15.00-15.30	Pistone: 'The Synthetic Conception of Proof: from Herbrand's Theorem to Geometry of Interaction'	Lam: 'Contextual Physical Identity'	Isaac: 'A Group Theoretic Approach to Rational Decision Making'	Dolcini: 'Self Deception without Deception'
15.30-16.00	Numerico: 'The Weak Epistemological Status of Computing, Licklider's Insight on Computers and Research: the Crucial Role of Datification'	Bartels: 'How to Bite the Bullet of Quidditism – Why the Standard Argument against Categorical Properties in Physics Fails'	Crupi: 'A Probabilistic Account of Entailment and Refutation'	Arcangeli/Dokic: 'Mental Time Travel and Engaged Imaginaton'
16.00-16.30	Bocconi: 'A Theory for Fregean Concepts and Objects'	Ghins: 'Do We Need Powers to Unify the Laws of Nature?'	Bewersdorf: 'Total Evidence and Uncertainty'	Tripodi: 'Gendered Metaphors in the Philosophy of Science'
Coffee break				
Time	Aula 'Conferenze' Philosophy of mathematics and truth - PIAZZA	Aula 'Verra' Quantum logic and computation - GIUNTINI	Aula 24 Epistemology II - CARRARA	Aula 26 Philosophy of mind and cognition - SGARAVATTI
17.00-17.30	Cieslinski: 'The Innocence of Truth'	Sergioli: 'Holistic Structures in Quantum Computation. An application to Werner and Isotropic States'	Brössel/Eder: 'How to Resolve Doxastic Disagreement'	Pinna: 'Finger-Counting and Acquisition of Numerical Skills'
17.30-18.00	Marrano/Hosni: 'Comparing Degrees of Truth: Lessons from Utility Theory'	Cuffaro: 'Quantum Computation and How-Possibly Explanation'	Klein/Marx: 'Modeling the Dynamics of Generalized Trust. Scope and Limits of Formal, Experimental and Computational Approaches'	Amoretti/Manzotti: 'Some Reasons not to Be Internalists about the Physical Correlates of Consciousness'
18.00-18.30	Cogliandro/Ternullo: 'On the Necessity of Large Cardinals'	Cinà: 'Connecting Categorical Quantum Mechanics and Dynamic Quantum Logic'	Battaglia/Poellinger: 'Decision-Making in the Loop and the Moral Imitation Game'	
18.30-20.00 Aula Magna: General SILFS meeting				
20.30 Social Dinner, Ristorante 'La Mansarda'				

June 20				
Time	Aula 'Conferenze' Philosophy of the life sciences I - CORSI	Aula 'Verra' Philosophy of physics I - CASTELLANI	Aula 24 General philosophy of science I - FELLINE	Aula 26 Logic I - PAOLI
9.30-10.00	<i>Special lecture</i> <i>SILFS BestPhD Thesis winner</i>	Curiel: 'Carnot Cycles and Black Holes'	Sprenger: 'Explicating Degree of Corroboration'	Godziszewski: 'Yablo Paradox in Partial Semantics and Potentially Infinite Domains'
10.00-10.30	S. Giaimo: 'The Pleiotropy Theory of Ageing: Conceptual, Methodological and Empirical Issues'	Badino: 'How Typical! Genealogy of a Concept'	Scorzato: 'A Partial but Unambiguous Characterization of Scientific Progress'	Cevolani: 'A Better Way Out of the Preface Paradox'
10.30-11.00		Afriat: 'Is the World Made of Loops?'	Seidel: 'Rational Disagreement in Science without Methodological Incommensurability'	Marra: 'For a Dynamic Account of Deontic Logic. The Miners and other Paradoxes'
Coffee break				
Time	Aula 'Conferenze' Philosophy of the life sciences II – CORSI	Aula 'Verra' Philosophy of Physics II - CASTELLANI	Aula 24 General philosophy of science II - FELLINE	Aula 26 Logic II - PAOLI
11.30-12.00	Bertolaso: 'Disentangling Context Dependencies in Biological Sciences'	Wolff: 'Criteria of Physical Significance for Quantities in Physics'	Backmann: 'Even Better Best Systems, Special Sciences and Demarcation'	D'Agostini: 'Coercive Logic. Paradoxes and Undeniable Truths'
12.00-12.30	Lorusso: 'Complex Causation and Race Concepts'	Sus: 'Dark Matter, the Equivalence Principle and Modified Gravity'	Zamora Bonilla/Rodriguez Fernandez: 'The Game-Theoretic Logic of Scientific Discovery'	Ledda/Gil-Férez/Tsinakis: 'The Failure of Amalgamation Property for Semilinear Varieties of Residuated Lattices'
12.30-13.00	Germain, Ratti, Boem: 'The Encode Project and the Function Controversy'	Strocchi: 'Symmetries, Symmetry Breaking and Gauge Symmetries'	Manafu: 'On the (Im)possibility of a Unified Science of Multiply Realized Kinds'	Negri/Sbardolini: 'Proof Analysis for Lewis Counterfactuals'
13.00-14.30 Lunch break				
Time	Aula 'Conferenze' Philosophy of the life sciences III - ARPAIA	Aula 'Verra' Philosophy of Physics III - LAUDISA	Aula 24 The nature of reasoning and beliefs - CEI	Aula 26 Logic III - Paraconsistency - GIUNTINI
14.30-15.00	Nardini: 'Monitoring Clinical Trials: Ethics and Epistemology in Medicine'	Lalli: '"Geometry as a Branch of Physics": Philosophy at Work in Howard P. Robertson's Contributions to Relativity Theory'	Bianchini: 'Analogy between Making and Reasoning'	Ciuni/Omori: 'Consistency Operator, Just-True Operator and Paraconsistent Weak Kleene'
15.00-15.30	Tambolo: 'Placebo Effect and the Justification of Methodological Rules'	Brian Pitts: 'Historical and Philosophical Insights about General Relativity and Space-Time from Particle Physics'	Crupi/Girotto: 'Models of Rationality and the Psychology of Reasoning: from Is to Ought, and Back'	Ciuni/Carrara: 'Logical Consequence in Paraconsistent Weak Kleene'
15.30-16.00			Feldbacher: 'Meta-Inductive Strategy Selection'	Piazza/Pulcini: 'A Unified Setting for Non-Monotonicity and Paraconsistency'
Coffee break				
16.30-18.00 Aula Magna - Plenary lecture, John Norton: 'A Material Dissolution of the Problem of Induction'				
Closing of the conference				

<i>June 21</i>
Satellite Event - Workshop 'Current Trends in the Philosophy of Logic' Aula 'Conferenze'
9.30-9.45 Opening address
9.45-10.30 Hannes Leitgeb (LMU, Munich), "Probabilistic theories of type-free truth and probability"
10.35-11.20 Julien Murzi (University of Kent), "Instability and revenge"
11.20-11.50 Break
11.50-12.35 Elia Zardini (University of Barcelona), "Instability and contraction"
12.35-14.00 Lunch break
14.00-14.45 Dave Ripley (University of Connecticut), "Why I am not a noncontractivist"
14.50-15.35 Peter Schroeder-Heister (University of Tuebingen), "Harmony in proof-theoretic semantics"
